TITLE OF INVENTION: METHOD FOR FACILITATING COMMERCE AT AN INTERNET-BASED AUCTION

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	YES	\$755	\$0	\$0	\$755	09/15/2009

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 507 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 507 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Prosecution History

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 19th of March, 2009 has been entered.

The examiner notes that claims 21 and 22 remain pending for examination and that claims 1-20 and 23-24 have been canceled.

The examiner notes therefore claims 21 and 22 are in condition for allowance for at least the reasons set forth below:

Examiners Statement for Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a system for facilitating commerce at an internet-based auction. The system includes authorizing a first participant to post an item for auction at an internet auction site. The received information includes a

Art Unit: 3627

designation of a category selected from a list of categories, under which the item is to be auctioned. The received information is processed into a presentation format with a database-to-presentation format formatting program. The presentation format includes an indication of the category of the item to be auctioned. The presentation formatted information is presented to a plurality of internet participants. The host computer then receives at least one bid for the auctioned item from at least one of the internet participants.

The following reference has been identified as the most relevant prior art to the claimed invention. The prior art mostly relates to a computer system for facilitating an electronic auction.

Lindsey et al. (US 5,285,383) discloses a computer system executing a computer application program operative to authorizing a plurality of remote seller participants (gin seller) to post, using a computer application program executing on a computer system associated with the plurality of remote seller participants, a plurality of items (cotton bales) for auction at a remote auction system. Lindsey et al. further disclose the computer application program retrieving information about a structure of the remote auction system from a data repository while the computer application program is isolated from communication with the remote topical arranged internet based auction system (cotton gin application program allows for data as set forth gin name, address code see col. 5 lines 55-60); a database stored in the computer system having a

Art Unit: 3627

structure corresponding to the structure of the remote auction system including a selection of categories and sub-categories for the arrangement of multiple auction instances by the plurality of seller participants (data base 25); the user interface program operative to provide one or more data input fields to receive from the plurality of remote participant sellers a title and a subjective textual description for the plurality of items (cotton gin application program allows for data as set forth gin name, address code see col. 5 lines 55-60); the computer system generating a data header that contains a user identification code corresponding to the plurality of remote participant sellers for the data record created for the plurality of items (see table col. 7,8 of Lindsey et al.). Lindsey et al. further disclose a table (see cols. 7 et seq.) which the host computer system presents as formatted information to a plurality of bidding internet participants (commodity buyer terminals 18), and receiving at least one bid for the plurality of items from at least one of the plurality of bidding internet participants (see col. 28 lines 48-52).

However, Lindsey et al. fails to disclose the computer application program further including a user interface program operative to provide to the plurality of seller participants the selection of categories and sub-categories for inputting data to build a data record of the plurality of items that will be subsequently posted into the remote topical arranged internet- based auction system, the selection of the categories and sub-categories based at least in part from the information about the structure of the remote topical arranged auction system retrieved from the data repository to assure

Art Unit: 3627

proper linkage into the structure maintained by the remote topical arranged internet-based auction system when the computer application program subsequently communicates the data record of the items to create the automated ascending bid auction instances for the plurality of items at the remote topical arranged internet-based auction system; and a communication handler program executing on a host computer system housing the remote topical arranged internet-based auction system receiving information from the computer application program executing on the computer system about the plurality of items to be auctioned, the received information comprising the selection of categories and sub- categories, the title and the subjective textual description of the plurality of items, and the data header and the use of authentication information to logon to an open network on order conduct transactions and the asynchronous generation and scheduling of automated ascending bid auction instances whereby remote seller participants are authorized to operate a computer application program to coordinate asynchronous generation and scheduling of automated ascending bid auction instances in the remote arranged internet-based auction system while the computer application program is isolated from communication with the remote topical arranged internet- based auction system does he disclose the handler program further processing the received information at the host computer system housing the remote internet based- auction system into a presentation format comprising scheduling information received from the seller participant operating the computer application program to (a) post the data record in the remote topical arranged internet- based auction system to initiate the automated ascending bid auction instances at the remote

Art Unit: 3627

arranged internet- based computer system, (b) designate a time at which the computer application program will contact the remote topical arranged internet-based auction system to post at least one data record to initiate the automated ascending bid auction instance for the at least one data record at the remote topical arranged internet-based auction system, or (c) post the data record in the remote topical arranged internet-based auction system designating the plurality of items as on-hold awaiting the automate descending bid auction instance start date at the remote topical arranged internet-based auction system.

A person having ordinary skill in the art at the time the invention was made would have not been motivated to combine the limitations/missing features with Lindsey et al.. The examiner notes the combination of missing features and the other limitation(s) found in the independent claim make the invention novel and unobvious over the cited prior art.

The following non patent literature has been identified as the most relevant prior art to the claimed invention. The prior art mostly relates to the building of a disturbed electronic marketing system

"The Design and Building of ENCHERE, A Distributed Electronic Marketing System," by Banatre et al., discloses a topically arranged system in which a plurality of sellers may post items for sale (see at last, page 7). Banatre further discloses the use of time

Art Unit: 3627

stamps to inform the buyers system of the sellers that posted their items first thereby creating fairness between the plurality of sellers (see at least, page 7).

However, Banatre et al. fails to disclose the computer application program further including a user interface program operative to provide to the plurality of seller participants the selection of categories and sub-categories for inputting data to build a data record of the plurality of items that will be subsequently posted into the remote topical arranged internet- based auction system, the selection of the categories and sub-categories based at least in part from the information about the structure of the remote topical arranged auction system retrieved from the data repository to assure proper linkage into the structure maintained by the remote topical arranged internet-based auction system when the computer application program subsequently communicates the data record of the items to create the automated ascending bid auction instances for the plurality of items at the remote topical arranged internet-based auction system; and a communication handler program executing on a host computer system housing the remote topical arranged internet-based auction system receiving information from the computer application program executing on the computer system about the plurality of items to be auctioned, the received information comprising the selection of categories and sub- categories, the title and the subjective textual description of the plurality of items, and the data header and the use of authentication information to logon to an open network on order conduct transactions and the asynchronous generation and scheduling of automated ascending bid auction instances

Art Unit: 3627

whereby remote seller participants are authorized to operate a computer application program to coordinate asynchronous generation and scheduling of automated ascending bid auction instances in the remote arranged internet-based auction system while the computer application program is isolated from communication with the remote topical arranged internet- based auction system does he disclose the handler program further processing the received information at the host computer system housing the remote internet based- auction system into a presentation format comprising scheduling information received from the seller participant operating the computer application program to (a) post the data record in the remote topical arranged internet- based auction system to initiate the automated ascending bid auction instances at the remote arranged internet- based computer system, (b) designate a time at which the computer application program will contact the remote topical arranged internet-based auction system to post at least one data record to initiate the automated ascending bid auction instance for the at least one data record at the remote topical arranged internet-based auction system, or (c) post the data record in the remote topical arranged internet-based auction system designating the plurality of items as on-hold awaiting the automate descending bid auction instance start date at the remote topical arranged internet-based auction system.

A person having ordinary skill in the art at the time the invention was made would have not been motivated to combine the limitations/missing features with Banatre et al. The examiner notes the combination of missing features and the other limitation(s)

Art Unit: 3627

found in the independent claim make the invention novel and unobvious over the cited prior art.

Any comments considered necessary by the application must be submitted no later than the payment of the issue fee and, to avoid processing delays, show preferably accompany the issue fee. Such submission should be clearly labeled "Comments On Statement of Reasons for Allowance".
